Art Unit: 1654

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 3-4, drawn to a peptide inhibitor based upon the sequence of cAMP response element binding protein, an example of which is SEQ ID NO:5, classified in class 530, subclass 327.
 - II. Claims 5-6, drawn to a peptide inhibitor based upon the sequence of heat shock factor-1 protein, an example of which is SEQ ID NO:7, classified in class 530, subclass 327.

The inventions are distinct, each from the other because:

The inventions of Group I and Group II are patentably distinct products. The products are patentably distinct from one another because of their materially different amino acid sequences. A search of one of the sequences would not be expected to uncover prior art relevant to the other sequence.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the sequence search required for Group I is not required for Group II, and the sequence search for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

2. Claims 1, 2, and 7-9 link(s) inventions I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 1, 2, and 7-9. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the

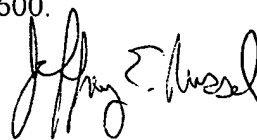

Art Unit: 1654

limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey E. Russel at telephone number (571) 272-0969. The examiner can normally be reached on Monday-Thursday from 8:30 A.M. to 6:00 P.M. The examiner can also be reached on alternate Fridays.
